

Voice Mail Broadcasting

Record, schedule and send your voicemail broadcasts to a few, or a few thousand. Call Loop's voicemail broadcast service offers direct to voicemail broadcasts and call transfers, or you can customize your audio for live or recorded voicemail broadcasts. Call Loop's voice mail broadcast service is fully customizable.

Voicemail Broadcasting Service

Customize your voicemail broadcast blasts with two messages: one for a live pickup, and an alternative message for direct to voicemail.

Customized Voicemail System

When a live person answers, play message "A" and when it's a direct to voicemail broadcast, play message "B". Our voicemail broadcasting service ensures you always deliver the right message!

Schedule Voicemail Broadcasts

Send your voicemail broadcasts whenever you'd like! Select the day and specific time you'd like your voicemail delivered, or a time range of when to deliver your messages with our voice mail marketing system.

Live Transfers & Call Forwarding

Give voice mail broadcast recipients the option to be transferred directly to a live agent to place an order, confirm an appointment, or complete any other activity.

Customized Caller ID

Our voicemail broadcasting service allows you to create your own Caller ID number for your automated voicemails. Our voicemail broadcast service will show the number that you want to appear on your recipients' phone when they check their voicemail.

Voice Recognition

Your voicemail broadcast is played only when a real person's voice is detected, whether live or on their voicemail. Our voicemail broadcast service uses a precise system to detect when a real caller is on the line.

Voice Mail Marketing System Uses

- **Voice Mail Blasts** Communicate with your entire contact list by sending a pre-recorded direct to voicemail broadcast
- **Notifications & Alerts** Notify your customers of important dates or deadlines, send voicemail broadcasts to alert subscribers about events and updates with our voicemail broadcast service
- **Sales & Promotions** Advertise special offers, sales and promotions with a direct to voicemail broadcast
- **Surveys & Polls** Use voicemail broadcasts to create surveys and polls to better understand your customers' needs
- **Emergency Alerts** Send your contacts notifications of an emergency with a voice mail broadcast
- **Keep In Touch** Stay engaged with customers by keeping them informed and involved in your business with direct to voicemail broadcasts.

Voicemail Broadcasting for Any Use

Call Loop's Voicemail Broadcast Service can be used for businesses, schools, communities and more. Here are just some of the ways our customers have utilized direct to voicemail broadcasts

- **Businesses** – Call Loop's voicemail marketing system is an exceptional way to keep in touch with customers, promote new products and services and stay engaged with customers.
- **Community Centers** – Staffers and volunteers can send direct to voicemail broadcasts to alert their communities to upcoming events and activities.

Community organizers can use our voicemail broadcast service to send messages to customized lists for specific alerts like spin class schedules, game cancellations as well as event changes or timed maintenance schedules.

- **Schools** – Voice mail broadcasts are a great way to notify parents of important notifications regarding their children’s school or school system. Whether to alert parents to cancellations, school emergencies, or field trip reminders, voicemail broadcasts are a fast and efficient way to get the message out.
- **Churches** – Organizers of local churches can use voice broadcasts as a personal way to keep in touch with their congregations. By sending a voice mail broadcast, they can let their parish know of upcoming church events, special masses or Sunday school classes.
- **Realtors** – Agents can utilize our voicemail broadcast service to quickly notify clients of open houses or to alert them when a new property has become available.
- **Local Governments** – City and state officials can utilize our voice mail broadcast service along with text alerts to keep their community informed. Whether there are road closures, large construction areas, town hall meetings or local emergencies, a voicemail broadcast will deliver the message in minutes.

Customizing Your Voicemail Broadcasts

- When speaking to a live person, it is important that your voicemail broadcast has the right message, which should be more conversational than what you would want to leave on a direct to voicemail broadcast.
- When leaving a direct to voicemail broadcast, your voice broadcast should be more concise and succinct so you are getting your message across as quickly as possible.
- Avoid leaving long messages when voicemail broadcasting as you should aim to get your recipients’ attention in the first 3 seconds, the time it takes for most customers to hang up or ‘delete’ the voicemail.
